

BATH POD

Griform Innovations® offers components and room systems made of DuPont™ Corian® for use in areas that require sanitizing and decontamination in your facility. Components and room systems are built to pre subscribed specifications for all areas that come under scrutiny for safety, usability, portability and design detail.

BATH POD

From floor to ceiling the **Griform Innovations®** Bath Pod is made of seamless DuPont™ Corian®, creating a durable, and waterproof environment. The Pod includes walls, sink and faucet, grab bar, door and hardware. The components are built to pre-subscribed specifications.

BATH POD

Griform Innovations® lavatory is made of DuPont™ Corian®. It is completely seamless which aids in maintaining a sanitary environment. It resists stains and is easy to clean. The lavatory bowl and apron are all monolithic and provide easy care in a wide color pallet.

BATH POD

Griform Innovations[®]
Water Faucet Stem is made of completely seamless DuPont[™] Corian[®]. It has the added value of a built in soap dispenser.

BATH POD

Grifform Innovations®
Bath Pod controls for lights, water, soap, and toilet are made of DuPont™ Corian® and are all hands free applications, which help maintain the sanitary conditions.

BATH POD

Griform Innovations®

Grab Bar is made of DuPont™ Corian® and is totally seamless. It is durable and will not support the growth of microorganisms, and is attached using concealed hardware. The rails are available with slip resistant surface for an added safety feature.

BATH POD

Griform Innovations®

Bath Pod lighting is acquired by backlighting translucent DuPont™ Corian® which helps maintain the seamless application. This is a revolutionary NEW surfacing material that integrates lighting into the structural element of the design.

BATH POD

Grifform Innovations®

Bath Pod has a low threshold entrance and ample room, making it meet the intent of the ADA rulings.

BATH POD

Grifform Innovations®

Bath Pod door hardware and track roller system are all made of DuPont™ Corian®. The innovative design allows the door to glide open and closed easily.
